BLT Kit™ -SPS

Bariatric Lateral Transfer Kit

The Bariatric Lateral Transfer Kit (BLTKit-SPS) offers the classic AirPal Air-Assisted Lateral Patient Transfer system in a low-cost, compact form that is ideal for EMS, post-acute, long-term and home care settings.

The AirPal BLTKit-SPS contains all of the components necessary to laterally transfer two (2) patients with air-mattress comfort and reduced injury risk to patients and caregivers. Replacement BLTKit components can be ordered quickly and easily online as needed.

Gentle, Air-Assisted Lateral Transfer

Using air-assisted lateral transfer technology that AirPal invented 30 years ago, caregivers can laterally transfer the patient on a cushion of air coming out of tiny holes in the bottom of the SPS (Single-Patient-Stay) *TransferPad*. The AirPal SPS disposable has a rugged design that holds up for multiple lateral transfers with the same patient. Designed with advanced fabrics and coatings, the Airpal SPS is easy to wipe clean with standard anti-bacterial cleaners. Unlike competitor disposables, it can even be laundered. The AirPal SPS is a high-quality disposable—just what you'd expect from the premium health care specialists at AirPal!

Essential for Patient Care—and Economical!

The BLTKit is offered at a price that is below the average threshold for capital purchases, so the benefits of the proven AirPal Air-Assisted Lateral Patient Transfer System have never been easier to obtain!

Order your AirPal BLTKit today and always be prepared to laterally transfer a patient on a cushion of air—gently and safely!
